DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Regarding claim 21, the prior art fails to teach a combination of the steps of:

forming higher layer protocol adjacencies with the subset of nodes based on the processed lower layer topology information for the flooding of higher layer routing information among the set of nodes on the subnetwork;

receiving updated lower layer protocol information;

processing the updated lower layer protocol topology information; and

changing the higher layer protocol adjacencies based on the processed updated lower layer protocol topology information, in the specific combination as recited in the claim.

Regarding claim 29, the prior art fails to teach a combination of the steps of:

a processor for processing the lower layer protocol topology information to provide the topology information to a higher layer protocol, wherein the higher layer protocol forms higher layer protocol adjacencies with the nodes in the subset based on the processed lower layer topology information for the flooding of higher layer routing information among the set of nodes on the subnetwork, in the specific combination as recited in the claim.

Regarding claim 37, the prior art fails to teach a combination of the steps of:

a higher layer protocol module for forming higher layer protocol adjacencies with the subset of nodes based on the processed lower-layer topology information for the

flooding of higher layer routing information among the nodes on the first subnetwork, in the specific combination as recited in the claim.

Regarding claim 46, the prior art fails to teach a combination of the steps of:
forming higher layer protocol adjacencies with the subset of nodes based on the processed lower layer topology information for the flooding of higher layer routing information among the nodes on the subnetwork;
receiving updated lower layer protocol topology information;
processing the updated lower layer protocol topology information; and
changing the higher layer protocol adjacencies based on the processed updated lower layer protocol topology information, in the specific combination as recited in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
